Docker | Intermediate   JavaScript | Intermediate   Sql Server | Intermediate

MySql | Intermediate   PostgreSql | Intermediate

Volunteer activities

Member of the Scientific Association of Computer Science	2022
Teacher Assistant	2023

About Me

My interest in computers and programming goes back a long time. Fortunately, I was able to choose my field of study in the university according to my interest and enjoy progressing in this field day by day. I was very interested in programming and the innovation behind it, so I went to the back-end and what better language than Python, which has worked well in fields such as artificial intelligence and machine learning? Currently, I do not have any experience in the

company, but I have completed several projects and I am ready to start working as a new employee.
